INTERMIX FLASH TIME: Allow to flash from 30 minutes up to 4 hours maximum prior to applying klear.

Note: Shop conditions can vary flash time.

STANDARD SHIMRIN2® FORMULA DECODER

The color formula code can be found on the back side of each of the individual color chips. These formula numbers indicate what components are mixed to create the Shimrin2® Kustom Kolor along with the two trailing digits corresponding to the KD Series DTS Foundation Surfacer Sealer that is being used.

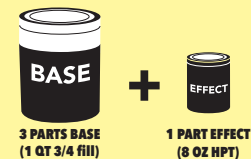

HOK0147-03

First two digits represent corresponding Shimrin2 Karrier Base. (Example: 01 = S2-01 Solar Gold)

HOK0147-03

Second two digits represent corresponding Shimrin2 Effect Pac. (Example: 47 = S2-FX47 Metajuls - MBC Silver FX)

SIMPLIFIED MIXING RATIO

3 PARTS KARRIER BASE + 1 PART EFFECT PAC
REDUCE ABOVE MIXTURE 2:1

HOK0147-03

The Trailing two digits represent the corresponding KD Series DTS Foundation Color:

- 00 = KD3000 Gray
- 01 = KD3001 Black
- 02 = KD3002 White
- 03 = KD3003 Yellow
- 04 = KD3004 Red
- 05 = KD3005 Blue

NOTE: Formulas containing a "V" have special FX mixing instructions. Please utilize the House of Kolor website when mixing these kustom colors.
